

Overview

Investigate any iPhone or Android Smartphone using the Cellphone Investigation Kit. (CPIK)

iPhone & Android operating systems are inside over 99% of the worlds smartphones and the tools inside the CPIK ensures Investigators can perform a digital dump from virtually any smartphone.

Smartphones and the Application software market (Apps) that are installed on the devices means no two smartphones are ever the same.

CPIK provides investigators with a carbon copy of most data stored on the target device and much more. Lots of the back-end information is also reported on the tools inside the CPIK. this type of information has proven crucial to Law Enforcement Investigations since smartphones were introduced to the mass market.

Apps are the DNA of Smartphones

Apps are typically installed based on users' preferences and each App can provide a unique set of data, data which could provide crucial evidence for an investigation.

Applications installed onto a smartphone mean no two smartphones' data is ever the same, each app provides a unique insight into the user digital and real-life behaviour. Applications from 3rd parties' software's can also provide enhanced information about the target phones activities and locations.

SIM Card Analysis

The CPIK also the ability to perform SIM Card data extractions and each CPIK comes supplied with a 64GB USB drive which is normally used to save important information which can then be used for case file creation purposes.

All tools inside the CPIK have free updates for life and there is no limit on the amount of phone examinations a user can perform.

The CPIK is used by many Law Enforcement agencies and has been the go-to tool for cell phone data dumps for nearly 15 years.

Tools that Evolve with Technology

The Cellphone Investigation kit is a continually evolving system owing to the nature of the continual development of the Cell Phone and App Software industry.

Apps and settings on phones provide each phone with a unique profile based on the users' preferences, this unique footprint means data acquisitions can vary depending on apps on the device and setting preferences of the target handset.

All tools inside the Cellphone Investigation kit come with free updates and unlimited usage.

Users are required to update their software at least once a year to ensure the tools do not miss important updates.

Features

- Complete Cellphone Investigation Kit
- Investigate – iPhone and Android based systems & any SIM Card
- Investigation tools for 99% of the Worlds Cellphones
- Cable Kit & adapter accessories to ensure connectivity to most cellphones
- 64GB USB Memory Stick for exporting evidence for case file creation
- Free Updates for life
- Zero Subscriptions fees
- Use as many times on as many cellphones as you need
- iSearch – Search Data using keywords, numbers & Symbols
- Works with iPad and Android Tablets
- Free Lifetime Support
- Comprehensive systems, no training courses required.
