

## Overview

The Digital Investigation kit provides Investigators with the ability to acquire data from all types of digital devices including iPhone, Android & Windows operating systems.

DIK is a complete solution for virtually all digital investigation needs and can be used for all types of digital data acquisitions, useful for all types of digital investigations including

iPhone Investigations  
Android Investigations  
SIM Card Examinations  
Covert Digital Surveillance  
Illicit Image Auditing  
Windows OS – Deleted Data Investigations

## Unlimited Lifetime Use

Each tool inside the DIK is a tried and trusted solution which has been available and continually updated to the latest operating systems for nearly 15 years. Investigation agencies and LE users benefit greatly from the Digital Investigation kit as users have free updates for life on every tool and there is no limit on the number of devices you can use the tools on.

The Digital Investigation kit enables investigation agencies to instantly begin offering or expanding on their digital investigation services.

The Digital Investigation kit is the only kit an agency needs from the PBN-TEC range of data investigation software.

The DIK includes every tool within the digital investigation range.

## Automatic Digital Duplication Processing

Perform automatic Image and Video duplication sweeps across virtually any digital device using the Capturra SmartDrive, Duplication software designed to automatically duplicate multimedia content from digital devices, leave no trace of process on the target device.

## Other Useful tools inside the Digital Investigation Kit

Examine SIM Card data, target Windows computers for illicit content, turn any Windows PC into a covert audio recorder.

## Tools that Evolve with Technology

The Digital Investigation kit is a continually evolving system owing to the nature of the continual development of the Cell Phone and App Software industry.

Apps and settings on phones provide each phone with a unique profile based on the users' preferences, this unique footprint means data acquisitions can vary depending on apps on the device and setting preferences of the target handset.

All tools inside the Digital Investigation kit come with free updates and unlimited usage. Users are required to update their software at least once a year to ensure the tools do not miss important updates.
