

Overview

K-Ultra-OTG is a tiny wearable audio recorder with upto 18 hours of continuous recording ability on one charge.

The miniature size of this device ensures users can record audio discreetly whilst wearing the device.

Supplied with a sturdy metal clip, users can attach it to their clothing and tuck the device inside a pocket or behind a jacket.

The Audio quality on the K-Ultra can capture sounds upto 40 Feet away.

K-Ultra has multiple playback modes, users can listen to playback onboard the device, using the supplied headphones, in addition users can listen to recordings through any Windows or Mac Computer and through any iPhone or Android device, using the supplied OTG adapter.

K-Ultra-OTG has two modes of recording, sound activation and continuous recording.

Users can adjust settings such as sensitivity through using the custom software inside the device, time and date stamping can also be configured (Windows Only)
